Education & Coursework

Galgotias University, Greater Noida, Uttar Pradesh, India | 2022 – 2026

Bachelor of Technology in Computer Science and Engineering, CGPA: 7.4

Relevant coursework: Data Structures and Algorithms, Database Management Systems, Object Oriented Programming, Computer Networks, Machine Learning

Technical Skills

- **languages:** Java, Python, JavaScript, SQL
- **frameworks & backend:** Node.js, Express.js, React, RESTful APIs, EJS
- **databases & cloud:** MongoDB, Mongoose, MySQL, Cloudinary, Render
- **machine learning:** Scikit-learn, XGBoost, SHAP, Pandas, NumPy, Streamlit
- **developer tools:** Git, GitHub, Linux CLI, VS Code

Experience

Kyndryl, Noida, India | June 2026 – July 2026

Infrastructure Specialist Trainee

- Completed foundational enterprise onboarding and training on standard operating procedures, IT service management workflows, and corporate operational standards.
- Gained hands-on familiarity with enterprise management platforms including Workday and internal ticketing workflows.
- Studied infrastructure monitoring protocols and cross-functional enterprise communication practices within a global delivery framework.

Projects

Wanderlust – Full-Stack Accommodation Platform | 2026

Node.js, Express.js, MongoDB, Mongoose, EJS, Passport.js, Cloudinary, Mapbox, Render

- Engineered a full-stack accommodation web application featuring user authentication, session handling, and role-based access control.
- Developed robust CRUD functionality for property listings, user review systems, and category-based filtering.
- Integrated Cloudinary APIs for cloud image hosting and Mapbox GL for interactive map rendering and coordinate geocoding.
- Deployed the application to Render with production environment variables and persistent database clustering on MongoDB Atlas.
- Code repository: github.com/AnmolSrivastava3000/airbnb-clone
- Live demo: project-wanderlust-nmf1.onrender.com

IoT Intrusion Detection System & Traffic Analyzer | 2025-2026

Python, Scikit-learn, XGBoost, Pandas, NumPy, SHAP, Streamlit

- Processed and cleaned over 300,000 network traffic entries from the CICIoT2023 dataset to classify malicious and benign flows.
- Evaluated Decision Trees, Random Forest, XGBoost, and ensemble architectures, attaining 99.6% classification accuracy with Random Forest.
- Benchmarked false positive rates and class discrimination across imbalanced attack categories using ROC-AUC evaluation.
- Implemented SHAP explainability to compute global feature attribution and built an interactive Streamlit dashboard for real-time attack detection.
- Code repository: github.com/AnmolSrivastava3000/Intrusion-Detection-System-

Achievements & Research

- Presented research paper on intrusion detection using machine learning and ensemble models at 1st IEEE iSmartComp 2026, MMMUT Gorakhpur.
- Solved 200+ data structures and algorithms problems across online coding platforms.
- Secured 72.94% aggregate in TCS NQT IT, achieving a perfect 600/600 in Verbal Ability and 73.55% in hands-on programming with Java.
