PROFESSIONAL SUMMARY

Worked on Machine Learning and Cybersecurity with strong foundations in Data Structures & Algorithms and problem-solving. Experienced in building Intrusion Detection Systems (IDS) using ML models with a focus on classification, model evaluation, and explainable AI. Proficient in Java and data analysis, seeking entry-level roles in Machine Learning, Software Development.

SKILLS

- **Java -DSA, Python, JavaScript**
- **ML & Data: Scikit-learn, Pandas, NumPy, SHAP**
- **Tools: Git, GitHub, Linux, Streamlit**
- **Domain: Data Analyst, Machine Learning**

EDUCATION

- B. Tech Computer Science and Engineering| Galgotias University CGPA: *7.4*
- XII (CBSE) | Divine Sainik School *69.00%|2020*
- X (CBSE) | Divine Sainik School *85.02 %|2018*

ACADEMIC PROJECTS

- ***Intrusion Detection System using Machine Learning (IoT IDS)*** - Developed an Anomaly-based Intrusion detection system using ML models (Random Forest, XGBoost, Decision Tree, XGBoost, Voting Ensemble) trained on 300K CICIoT samples. Achieved high accuracy and ROC-AUC score for binary classification (Random Forest best performer). Applied SHAP for model explainability to identify key attack features. Built interactive dashboard using Streamlit for real-time traffic visualization.
- ***Real-Time Network Traffic Analyzer Dashboard***- Built a Streamlit-based dashboard for real-time network traffic monitoring and visualization. Implemented packet-level analysis and anomaly detection logic. Enabled identification of suspicious traffic patterns for improved network visibility. Optimized data handling for responsive and efficient visualization.

ACHIEVEMENTS

- **Solved 100+ DSA problems on platforms LeetCode / GeeksforGeeks.**
