PROFESSIONAL SUMMARY

Computer Science undergraduate with strong foundations in Data Structures & Algorithms, full-stack web development and machine learning. Experienced in building scalable web applications and data-driven systems. Proficient in Java, JavaScript and backend development. Seeking an entry-level Software Engineer role to contribute to real-world solutions.

SKILLS

- **Languages: Java, JavaScript**
- **Web Development: Node.js, Express.js, EJS, HTML, CSS**
- **Database: MongoDB**
- **Core CS: Data Structures & Algorithms, OOPs, DBMS, OS**
- **ML & Data: Scikit-learn, Pandas, NumPy, SHAP**
- **Tools: Git, GitHub, Linux, Streamlit**

ACADEMIC PROJECTS

- **Wanderlust – Hotel Booking Web Application (Full Stack)** - Developed a full-stack hotel booking platform using **Node.js, Express.js, MongoDB, and EJS**. Implemented **CRUD operations** for listings, reviews, and user accounts. Built **RESTful APIs** and followed **MVC architecture** for scalable backend design. Added **user authentication and session management**. Designed responsive UI with proper validation and error handling. Used **MongoDB Atlas** and Git/GitHub for version control.
- ***Intrusion Detection System using Machine Learning (IoT IDS)*** – Developed an Anomaly-based Intrusion detection system using ML models (Random Forest, XGBoost, Decision Tree, XGBoost, Voting Ensemble) trained on 300K CICIoT samples. Achieved high accuracy and ROC-AUC score for binary classification (Random Forest best performer). Applied SHAP for model explainability to identify key attack features. Built interactive dashboard using Streamlit for real-time traffic visualization.

EDUCATION

- B. Tech Computer Science and Engineering| Galgotias University — CGPA: *7.4*
- XII (CBSE) | Divine Sainik School — *69.00%|2020*
- X (CBSE) | Divine Sainik School — *85.02 %|2018*

ACHIEVEMENTS

- **Solved 100+ DSA problems on platforms LeetCode / GeeksforGeeks**
